NATIONAL MARROW DONOR PROGRAM®

University of California – San Francisco: Center Specific Analyses

Adult Program

This analysis is based on transplants performed from Jan. 1, 2007 through Dec. 31, 2009 using unrelated donors and transplants performed from Jan. 1, 2008 through Dec. 31, 2009 using related donors. It only includes patients who underwent their first allogeneic transplant within these respective time periods and who had at least a 100-day follow-up.

1. This center reported survival status data for **112** adult patients.

2. The **actual one-year survival** of these patients is **75%**.

3. The **predicted one-year survival** was **62%** (with 95% statistical confidence that the predicted survival was between 53% and 71%.)

4. This center's **actual** results are **higher than** the **predicted** range for this center.

For help with understanding these statistics, refer to *How to Understand Survival Statistics*

Pediatric Program

This analysis is based on transplants performed from Jan. 1, 2007 through Dec. 31, 2009 using unrelated donors and transplants performed from Jan. 1, 2008 through Dec. 31, 2009 using related donors. It only includes patients who underwent their first allogeneic transplant within these respective time periods and who had at least a 100-day follow-up.

1. This center reported survival status data for **67** pediatric patients.

2. The **actual one-year survival** of these patients is **88%**.

3. The **predicted one-year survival** was **75%** (with 95% statistical confidence that the predicted survival was between 65% and 84%.)

4. This center's **actual** results are **higher than** the **predicted** range for this center.
