NATIONAL MARROW DONOR PROGRAM®

University of California – San Francisco: Center Specific Analyses

Adult Program

This analysis includes **ONLY** patients who received their **FIRST ALLOGENEIC*** transplant between January 1, 2008 and December 31, 2010 **using unrelated or related donors**, **and** who had at least a 100-day follow-up.

1. This center reported survival status data for **134** patients.
2. The **actual one-year survival** of these patients is **72%**.
3. Based on a national average for patients like those transplanted at this center, 95% of the time the one-year survival is **expected** to be between 55% and 71% for patients at this center.
4. This center's **actual** results are **higher than** the **expected** range for this center.

**Allogeneic means using cells from a person other than the patient.*
